

Claims

1. Collapsible stroller with a seat element (1), a seat back (2), a first mounting (3) for at least one front wheel (5), a second mounting (4) for at least two rear wheels (6), and a pushing device (8) and a folding device (7), characterized in that the seat element (1), the seat back (2) and the first (3) and the second mounting (4) are attached to the folding device (7) on one side to be able to pivot around it, that the folding device (7) has pivot joints for pivoting of the seat element (1), the seat back (2) and the first (3) and the second mounting (4), and that the folding device (7) has a first position which corresponds to the operating position of the stroller, and a second position in which the stroller is collapsed.

2. Stroller as claimed in claim 1, wherein the folding device can be fixed in the first position, and wherein for collapsing the stroller out of the first into the second position there is a release mechanism for simultaneous release of at least two elements from the group of the seat (1), the seat back (2), the first (3) and the second mounting (4) and the pushing device (8).

3. Stroller as claimed in claim 1 or 2, wherein there is release mechanism for simultaneous release of the seat (1), the seat back (2), the first (3) and the second mounting (4) and the pushing device (8).

4. Stroller as claimed in one of claims 2 or 3, wherein the release mechanism comprises a Bowden cable (25).

5. Stroller as claimed in one of claims 1 to 4, wherein in the collapsed position the

seat element (1), the seat back (2) and the first (3) and the second mounting (4) are arranged roughly parallel to one another, protruding from the folding device (7).

6. Stroller as claimed in one of claims 1 to 5, wherein the seat element (1), the seat back (2) and the first (3) and the second mounting (4) in the operating position are arranged roughly in a star shape around the folding device (7).

7. Stroller as claimed in one of claims 1 to 6, wherein in the operating position the angles between the seat element (1), the seat back (2) and the first (3) and the second mounting (4) can be continuously fixed or can be selected between a given number of positions.

8. Stroller as claimed in one of claims 1 to 7, wherein the pivot joints of the seat element (1), the seat back (2) and the first (3) and the second mounting (4) are located flush on an axis of rotation.

9. Stroller as claimed in one of claims 1 to 7, wherein the pivot joints of the seat element (1), the seat back (2) and the first (3) and the second mounting (4) are located flush on two or three axes of rotation which run parallel.

10. Stroller as claimed in one of claims 1 to 9, wherein there is a stop for limiting the pivoting motion for at least one of the elements of the group of the seat (1), the seat back (2) and the first (3) and the second mounting (4).

11. Stroller as claimed in one of claims 1 to 10, wherein the stroller has means for fixing the stroller in the collapsed position.

12. Stroller as claimed in one of claims 1 to 11, wherein the seat back (2) has projections (17) for supporting the stroller in the collapsed operating position.

13. Stroller as claimed in one of claims 1 to 12, wherein there is at least one

carrying handle (13) for carrying the stroller in the collapsed position.

14. Stroller as claimed in one of claims 1 to 12, wherein at least one carrying handle (13) for carrying the stroller in the collapsed position is attached laterally to the seat element (1), to the seat back (2) or to one of the mountings (3, 4).

15. Stroller as claimed in one of claims 1 to 14, wherein a footrest (9) is attached to the first mounting (3).

16. Stroller as claimed in one of claims 1 to 15, wherein the pushing device (8) is attached to the seat back (2).

17. Stroller as claimed in one of claims 1 to 15, wherein the pushing device (8) is attached to the folding device (7) to be able to pivot.

18. Stroller as claimed in one of claims 1 to 17, wherein the pushing device (8) can be adjusted in length.

19. Stroller as claimed in one of claims 1 to 18, wherein in the collapsed position the lower surface of the seat element (1) and the first mounting (3) are the outer sides of the stroller.

20. Stroller as claimed in claims 19, wherein the seat element (1) has a folding or telescoping extension (10).

21. Stroller as claimed in one of claims 1 to 20, wherein the front wheels (5) and/or the rear wheels (6) can be pivoted by roughly 90° against the stroller.

22. Stroller as claimed in one of claims 1 to 21, wherein the front wheels (5) and/or the rear wheels (6) in the collapsed position are arranged projecting beyond the other elements and can be used to push or pull the stroller.

23. Stroller as claimed in one of claims 1 to 22, wherein there are protective

coverings (14) for the stroller in the collapsed position.
